Deadline for manuscript
submissions:

closed (31 August 2021)

Message from the Guest Editor

This Special Issue seeks research papers that contribute to our understanding of violence prevention within the full range of intimate, familial, community, and societal contexts. We will include contributions from prevention, policy, and/or activism perspectives addressing all forms and types of violence against women and children, e.g., sexual violence, domestic abuse, ‘honor’-based violence, prostitution, trafficking, and/or reproductive violence and abuse. We encourage the submission of prevention work targeting prevention with those who perpetrate violence against women and children, and work with men and boys as this helps to accelerate progress in prevention. We welcome original research papers using a range of study designs including systematic reviews and meta-analyses as well interdisciplinary work and multi-country collaborative research. Outcome data for program or intervention evaluations must include a comparison or control group. The aim of this Special Issue is to show the breadth of work to inform practice, policy, and future research in order to create violence-free families, communities, and societies.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
