Deadline for manuscript  
submissions:  
**closed (31 January 2023)**

### Message from the Guest Editors

COVID-19, with its clear epidemiological and social virulence, has triggered behavioral reactions, typical of health emergencies, which in a short period of time have significantly affected the health care model of our country. Indeed, all efforts have been directed, on one hand, toward slowing down the spread of infection and, on the other hand, assisting citizens affected by this disease in the best possible way. All this “works” in the short term with the primary objective of restoring social life and returning to “normal” as soon as possible. However, a health and social system aspiring to lay the foundations for real economic, organizational, and financial sustainability in a time of crisis must be able to provide itself with a vision in terms of programming and planning, which goes beyond the mere logic of the emergency and therefore of the short term, looking at the challenges awaiting in the medium and long term.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
