### Message from the Guest Editors

During the COVID-19 pandemic, the amount of health information available on the internet was amplified. Within this context, health literacy is more important than ever, in order for individuals to navigate these information environments and use health information to inform their behavior. Reliable and trustworthy information is key for people to understand recommendations and know what to do to protect themselves and others. The risk of being infected is dependent on other people's behavior, such as their adherence to the precautionary procedures and national measures. In addition, COVID-19 vaccination campaigns have certainly suffered from the influence of inadequate health literacy, even though its real impact is yet to be quantified.

For this reason, there is a strong need to foster research in the field of health literacy, health information, and digital health.

Original research articles and reviews addressing these topics are invited for this Special Issue.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Paul B. Tchounwou**

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
