Message from the Guest Editor

Dear Colleagues,

The family is of exceptional and lifelong importance to the physical and mental health, as well as the health behaviours, of children and adolescents. However, family support is rarely included in studies on child and adolescent health and well-being, albeit findings have also indicated its importance.

For this Special Issue, we invite research articles that focus on the family as an integral entity of parents and children, considering the role of family structure and support or other familial factors in child and adolescent health, well-being and health behaviour. Articles across a range of topics in the selected research area that employ various methods (such as cross-sectional or longitudinal studies, questionnaire surveys, time trend analyses, systematic reviews and meta-analyses) are welcome. Studies selecting specific groups of subjects (preschoolers, school-age children, students, etc.) are especially encouraged, as are research articles that present the results of studies in the social, cultural or historical context of the country. We look forward to reading your submissions.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
