Message from the Guest Editors

Improving the resilience of urban health systems and public health are key challenges for both developed and developing countries, especially in the post-COVID-19 era. The urban environment can play a role in these efforts, which is why it has received increasing attention from urban researchers, planners and managers. Urban built and social environments, such as public space, medical facilities, transportation, social capital, and community cohesion, affect the physical and mental health of urban residents by influencing their physical activities, environmental exposures, and social interactions. This Special Issue focuses on the complex and diverse relationships between urban environment and public health. In this Special Issue, we welcome research contributions on topics including, but not limited to, the following:

1. Built and social environment of cities and neighborhoods;
2. Environmental justice;
3. Segregation and social inequality;
4. Cross-scale interaction;
5. Promotion of healthy lifestyles;
6. Emergency response to infectious diseases;
7. Mental health improvement;
8. New data and methods in public health research.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
