Deadline for manuscript submissions:

closed (15 November 2023)

Message from the Guest Editor

Suicide, the intentional ending of a person's own life, accounts for approximately 817000 deaths and 2.2% of all years of life lost worldwide annually. Self-harm is a broader concept, which encompasses degrees of intentionality that are hard to separate: from attempted suicide to non-suicidal self-injury (NSSI). Although NSSI is distinguished from suicidal thoughts and behaviors in that individuals who self-injure are characterized as not consciously intending to die, NSSI has been strongly associated with suicide experiences.

This research topic is dedicated to better understanding the factors underlying suicide and life-threatening behavior across the lifespan. We aim to examine potential mechanisms and modifiable factors which may reduce risk of self-harm and suicide.

We welcome submissions on, but not limited to, the following topics:

Theoretical advances in understanding self-harm and suicide;

Epidemiology of self-harm and suicide;

Risk and protective factors of self-harm and suicide;

Suicide risk assessment;

Prevention strategies;

Treatment suggestions.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
