Deadline for manuscript
submissions:

closed (30 June 2023)

Message from the Guest Editor

Dear Colleagues,

The ongoing COVID-19 pandemic, caused by the SARS-CoV-2 virus, has adversely affected over 191 countries and territories. Understanding the spatial and space–time patterns and determining the factors that can explain/predict COVID-19 epidemiology can help public health decision-makers to better monitor and control disease outbreaks. This Special Issue of the *International Journal of Environmental and Public Health Research* will highlight the current and emerging spatial, space–time, mathematical, and bioinformatic techniques for addressing COVID-19 epidemiology for targeted interventions. Researchers are encouraged to present their insights into this issue by submitting high-quality reviews or novel research articles relevant to this topic. We highly encourage the submission of interdisciplinary work, particularly from the pandemic epicenters.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
