Second Edition of Promoting Healthy and Supportive Acoustic Environments: Going beyond the Quietness

Guest Editors:

Dr. Francesco Aletta

UCL Institute for Environmental Design and Engineering, Bartlett School of Environment, Energy and Resources, University College London, London WC1H ONN, UK

Dr. Simone Torresin

Department of Civil Environmental and Mechanical Engineering, University of Trento, Via Mesiano 77, 38123 Trento, Italy

Deadline for manuscript submissions:

closed (31 March 2023)

Message from the Guest Editors

The Second Edition of this Special Issue aims to gather contributions related (but not limited) to inter- and transdisciplinary approaches to the characterisation of the quality of the acoustic environments; experience of the sound environment during the COVID-19 lockdown; perception of acoustic environments in indoor and outdoor built environments, or soundscapes; impacts of acoustic and non-acoustic factors on human perception of the sound environment; relationship between acoustic environments and positive cognitive and health-related effects; new prediction and modelling methodologies for the acoustic environments and their qualities; mapping and monitoring of sound sources in the built environment; and the relationship between sound, space, and behaviour in the built environment. Contributions from a range of disciplines are welcome, including soundscape studies, noise control engineering, environmental design, social sciences, architecture and urban planning, spatial analysis, environmental psychology, epidemiology, and public health

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
