Deadline for manuscript  
submissions:

**closed (31 December 2020)**

### Message from the Guest Editors

Implementing the Internet of Healthcare Things has induced the existence of contemporary services in various healthcare fields, such as neurology, cardiology, endocrinology, urology, and other life-critical emergency utilities. Many pre-eminent healthcare institutions are expanding their expenditure on innovative smart healthcare services, and modern applications of the Internet of Healthcare Things (Intelligent/Autonomous Healthcare Service). These new healthcare services demand new models to acquire and handle sensory data, from the various Internet of Healthcare Things aspects and efficient strategies for accurate analysis and governance of such data.

Hence, the main interest for this Special Issue is to present the recent research work of researchers and practitioners who are conducting investigation in the field of smart and intelligent healthcare services and strategies to present the current research problems, issues, and advances in such a field. The aim of this Special Issue is to offer insights for discussions related to the considerable research challenges and comprehensive achievements on these topics of interest.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
