### Message from the Guest Editors

Recently, research on resilience has become increasingly crucial for efforts towards achieving sustainability. This Special Issue will present a series of articles on the theories, stewardship, and policies surrounding the concept of resilience and its role in creating sustainable and healthy social-ecological systems. In particular, we welcome papers focusing on the following issues:

1. Various policies of government/organizations for sustainable development goals.
2. Nature-based solutions to counteract social-environmental challenges and promote sustainable management.
3. Strategies to enhance the adaptive capacity and assessment of urban resilience.
4. The adaptation of excellent ecological and sustainable designs and stewardship practices.
5. Green infrastructure and its effectiveness and provision of ecosystem services.
6. Transformation planning for vulnerable areas.
7. Climate change and carbon neutrality.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
