Message from the Guest Editors

Dear Colleagues,

It is generally accepted that regularly playing sports or performing exercises provides health-related benefits including, but not limited to, lower risks of chronic diseases and improved physical fitness, and higher quality of life. Such exercise-related health benefits have been engaging more people participating in sports/exercises but resulting in increased sports injuries, which overburdens the current healthcare system where healthcare is provided after the onset of diseases or injuries. In addition to traditional focuses on physical and mental healthcare, anecdotal evidence suggests the importance of different perspectives of healthcare for sports participants, such as psychosocial/environmental assessment or growth and development perspectives. Thus, this Special Issue will welcome any formats of papers (i.e., original work, reviews, letters, etc.) addressing new trends in sports healthcare, especially those combining a high academic standard with a practical focus on providing effective proactive healthcare solutions.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
