closed (1 September 2021)

Message from the Guest Editors

This call aims to advance our understanding of the processes of recovery and concepts of citizenship and well-being for young people who live with substance use and mental health problems. We invite articles from different perspectives, across a wide range of topics on recovery and citizenship that explore, and address inclusion, exclusion, equity, and inequities faced by young people with substance use and mental health problems. We welcome articles which explore how services, policies, and communities can work together alongside young people to facilitate their recovery, citizenship, and well-being. The lived experience of young people is a vital means for us to advance our understanding of the issues they face, and so we particularly welcome articles from young adult service users, family members, and practitioners. We invite research that uses survivor/collaborative methodologies.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
