Message from the Guest Editors

Dear Colleagues,

Modern society faces various global and regional challenges including climate change, poverty, disease, and an aging population. To deal with these challenges, society has to be managed properly to follow a sustainable and low-carbon pathway. This Special Issue welcomes theoretical and empirical studies on issues including, but not limited to: economic analysis of the sustainable energy market, the influence of population dynamics on greenhouse gas emissions, climate mitigation policy analysis, air pollution reduction, sustainable waste treatment, and low-carbon lifestyle analysis.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
