### Message from the Guest Editors

The incorporation of technological solutions to all kinds of problems is something which is becoming more and more present in our daily life. Teleassistance devices, diabetes monitoring systems, intelligent houses or robotic pets are examples of present caring technologies that condition and modulate our relations with the environment and with others. “In the Hands of Technology: Care in the XXI Century” is an invitation to reflect on the development of care technologies, with a special interest in identifying the main challenges of the intensification of the implementation of technology into care processes.

Faced with discourses that often see the incorporation of technology into care processes as inevitable, we propose an in-depth discussion on how we want to be cared for in the future. Not to deny a role to technology, but to take it to the point where it can serve as a contribution to good care. We would like to receive submissions covering all the possible aspects concerning this debate: ethical, social, political, economic, and so on. More information on this issue can be found at:

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
