### Message from the Guest Editors

We are organizing a Special Issue on “Teenage Reproductive Health: Pregnancy, Childbirth, Contraception, Unsafe Abortion, and Fertility” in the *IJERPH*.

Improving reproductive health for teenagers is an important objective for public health officials and health ministries globally. Reproductive health refers to the health of an individual’s reproductive system during all stages of life. However, teenagers, and, in particular, teenage women, are very likely to encounter reproductive health issues. Many lower- and middle-income countries have laws that restrict reproductive rights, resulting in limited access to contraception, abortions and being able to express sexual orientation and choose gender. This leads to serious consequences including contributing to high maternal mortality, morbidity and potentially the imprisonment and social exclusion of teenagers.

In this Special Issue, we wish to shed light on this important area in order to map the current situation, propose solutions and aim to influence politicians and policymakers.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Paul B. Tchounwou**

RCMI Center for Urban Health  
Disparities Research and  
Innovation, Richard Dixon

University, 1700 E. Cold Spring  
Lane, Baltimore, MD 21251, USA

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
