Message from the Guest Editor

Dear Colleagues,

The global telehealth market continues to experience double digit growth and this is expected to continue over the next decade. There is therefore a need for continuing study into the use of existing available technologies and their application as well as a look into the future. There is an increasing use of home and mobile technologies being used to monitor many aspects of peoples lives from pure health and assisted living applications through to devices and applications that support health and wellbeing. The ethical and trust considerations that an exponential increase in data generation and data sharing will bring need to be discussed and resolved sooner rather than later. The use of consumer devices rather than a reliance on formal “medical technology” creates great opportunities but with it come challenges.

This Special Issue is designed to stimulate researchers and all interested communities from around the world to share their research and test their hypotheses with a likeminded audience so that we can create a future that serves to benefit us all.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
