closed (30 June 2023)

Message from the Guest Editor

Dyslexia is an "universal" developmental disorder affecting approximately 3-10% of the general population. Although there has been significant progress in studying the effectiveness of rehabilitation interventions for dyslexia, some important points still need to be better developed and require further confirmation from scientists.

With this Special Issue, we aim to address the following questions:

1. What are the new findings on treatments for developmental dyslexia?
2. Is it possible to evaluate the short- and long-term effects in treatments for dyslexia?
3. To what extent are the outcomes robust across different cognitive or learning profiles?
4. How could new technologies be useful to implement treatment effectiveness for dyslexia?

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
