submissions:
closed (31 December 2021)

Message from the Guest Editors

This Special Issue focuses on emerging trends in combustible tobacco and vaping product use. Studies examining longitudinal trends in prevalence of cigarette use, vaping product use, and poly-product use are of primary interest. In addition, we welcome papers examining differences in product use prevalence, future use intentions, health risk perceptions, and reasons for product use across countries, population subgroups, and/or policy environments. This Special Issue cannot accept any research funded by tobacco companies, including companies that produce e-cigarette/vaping products.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
