Deadline for manuscript  
submissions:

**closed (31 December 2022)**

### Message from the Guest Editor

Vaccination is one of the most significant public health interventions for reducing the burden of infectious diseases globally. Despite the continued success of vaccination in preventing infectious diseases, the spread of misinformation and antivaccination movements have led to increased vaccine hesitancy all over the world. According to the Strategic Advisory Group of Experts (SAGE) working group, vaccine hesitancy can be defined as the “delay in acceptance or refusal of vaccination despite the availability of vaccine services”. Vaccine hesitancy has increased worldwide due to different factors and barriers that should be addressed to improve the acceptance of global vaccination programs. Therefore, it is imperative to conduct high-quality research that can examine and understand the factors related to vaccine hesitancy related to COVID-19.

This Special Issue is designed to enable the rapid publication and dissemination of innovative research to advance the scientific knowledge and highlighting future perspectives on vaccine hesitancy associated with COVID-19 vaccines. We are interested in all aspects of COVID-19 research that relate to vaccine hesitancy.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
