Deadline for manuscript
submissions:

closed (30 June 2024)

Message from the Guest Editor

Although research on assisted living technologies in health promotion applications is making significant progress, it has not yet reached a sufficient level of maturity. Reasons for this shortcoming comprise multiple challenges in multidisciplinary fields encompassing rigorous randomized-controlled trials to assess the adoption and impact of assisted living technologies, the conception of inclusive design methodologies, the shift of the paradigm “ambient assisted living” toward “active and assisted living,” security and privacy issues (e.g., detection of cyber threats and intrusions, data integrity, and others), cutting-edge systems for data processing and communications (e.g., Internet of Healthcare Things infrastructures, wireless sensor networks, etc.), next-generation pervasive electronic devices (e.g., self-powered, flexible, textile), and much more.

This Special Issue of the journal *IJERPH* entitled “Assisted Living Technologies in Health Promotion” focuses on all of the previously mentioned aspects of research and development and aims to collect the most recent research and review articles addressing these challenges.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
