2. Institute of Water Resources & Hydro-electric Engineering, Xi'an University of Technology, Xi'an 710048, China

Prof. Dr. Abraham Esteve-Núñez

Department of Analytical Chemistry and Chemical Engineering, University of Alcalá, Campus Universitario, Ctra. Madrid-Barcelona Km 33.600, 28871 Alcalá de Henares, Spain

Deadline for manuscript submissions:

closed (31 January 2022)

Message from the Guest Editors

Nature-based and untraditional approaches are groups of technologies that can be deployed to address water environmental challenges related to surface water quality, groundwater quality, floods and water scarcity. In recent years, these kinds of technologies and their combination have been increasingly employed worldwide to improve water quality and to treat various wastewaters from domestic and industrial effluent. In addition, they are also employed for ecorestoration of water bodies to help to protect freshwater resources and safeguard nature's integrity. They can make a significant contribution to reversing the rapid decline in freshwater biodiversity and mitigating its impacts. These approaches are increasingly seen as cost-efficient strategies that need to be mainstreamed in water resource management strategies.

This Special Issue aims to gather the most updated research and development on various attempts and approaches of these kinds of technologies worldwide to attract greater investments from the water environmental industry for the purpose of promoting the water environmental protection.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
