Message from the Guest Editor

Wellbeing and welfare are at the heart of The 2030 Agenda for Sustainable Development, which was signed by all United Nations Member States in 2015. It provides a framework for the peace and prosperity for people and the planet, now and in the future. The 17 Sustainable Development Goals (SDGs) that it centers on connect and rely on both the mental and physical wellbeing of individuals on the one hand, and the economic and social welfare of communities on the other. The aim of this Special Issue is to feed research into this framework which connects and/or adds new perspectives on wellbeing and welfare. This would include, for example, investigations of the dimensionality and potential new dimensions of wellbeing or welfare; their antecedents, moderators and effects; comparative studies; meta-analyses; the interplay between wellbeing and welfare; synergies and trade-offs; and measurement and methodological issues and advancement.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
