

Wildlife and Public Health

Guest Editors:

Dr. Richard E. Connon

Dr. Diego Romero

Dr. Carlos Martínez-Carrasco

Dr. Paula Méndez Fernandez

Prof. Dr. Gregorio Mentaberre

Deadline for manuscript
submissions:
closed (18 January 2021)

Message from the Guest Editors

As we all know, wildlife and human public health are inextricably linked. Emerging diseases and wildlife species may be used as sentinels of biotic, abiotic, and environmental hazards for human health. Nevertheless, our understanding of the links between human, animal health, and environmental threats is far from complete. Thus, research on wildlife contributes to the “one health” perspective by providing key information to human communities around the world.

Hopefully, this Special Issue will contribute to advancing our understanding of how wild communities can influence human health in a changing world. We invite colleagues to participate in this Special Issue on Wildlife and Public Health with works which shed light on the connections between wildlife health, population dynamics, and public health in different ecosystems and/or scenarios. Namely, we encourage submissions with new data about infectious and parasitic diseases, pollutants and poisoning, experimental studies, and review articles describing the current state of the art in relevant topics. Recommendations and strategies of management to prevent risks in human communities are also welcome.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
