Message from the Guest Editor

Due to the increase in average life expectancy, the proportion of older workers is increasing. As older workers' participation has increased, there have been increasing numbers of temporary and part-time workers. These workers are mainly engaged in high-risk tasks due to the risk of outsourcing, exposing them to more risks than regular workers. Therefore, policies and designs that can identify their characteristics and requirements are needed to eliminate discrimination and ensure safety. A designed policy should provide a certain level of health and safety for all workers regardless of their employment contract statuses.

This Special Issue welcomes the submission of original work, reviews, and short communications including on the topics of an aged society and aging workforce, safety and health assurance and universal safety, older-worker-related safety and health policy, occupational injuries and illnesses of older workers in all industries, flexible working and sustainable work, error-proof design and worker-centered design, and reviews that cover all aspects of the aging society and older workers.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
