Message from the Guest Editor

This Special Issue is focused on all types of digital solutions (e.g., smartphone applications, virtual reality, data-driven approaches) that offer learnings on how to support the indispensable caregiver population that supports those with chronic conditions. Some examples of topics that could be covered include:

- Novel/innovative ways of engaging or “co-creating” with caregivers to produce higher-quality digital innovations aimed at improving wellbeing in caregivers;
- Digital innovations designed to support “informal” caregivers to improve overall wellbeing/quality of life, including within the community setting;
- Digital innovations used/tested in the care home/nursing home sector to support professional caregivers’ wellbeing;
- Digital innovations designed for remote monitoring and support;
- Data-driven approaches to understand and support professional and/or informal carers;
- Digital innovations that can help family members and friends of individuals who experience side effects of treatments and/or

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
