Message from the Guest Editor

Dear Colleagues,

Ageing is a major global issue that has various impacts on our world. Social and economic factors change an individual's lifestyle during ageing. We need to research the effects of these factors to improve quality of life in our super-aged society. For this Special Issue, we seek manuscripts that address the social and economic determinants of healthy ageing from diverse fields, such as public health, statistics, rehabilitation, medicine, epidemiology, data science, nursing, and sociology. Systematic reviews, meta-analyses, retrospective and prospective studies, case studies as well as randomized clinical trials are welcome.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
