Message from the Guest Editors

Dear Colleagues,

Cancer is one of the main causes of death around the world. Due to the progressive increase in cancer patients, a greater number of caregivers is needed. They must perform multiple tasks that generate a heavy workload, which can cause health problems (physical, psychological, and social, among others) that affect the quality of life of caregivers. For this reason, it is vital to research the role of cancer caregivers and health promotion activities aimed at improving the quality of life of these caregivers.

In this Special Issue, we invite multidisciplinary researchers interested in cancer caregivers and health promotion, to submit their papers based on different methodologies, including quantitative and qualitative studies, systematic reviews, and meta-analyses, among others.

Prof. Dr. María Dolores Guerra-Martín

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
