Message from the Guest Editors

Dear Colleagues,

We are organizing a Special Issue on the association between active/healthy aging and quality of life and wellbeing as a public health issue in the International Journal of Environmental Research and Public Health.

For this issue, we will accept scientific works focusing on conceptual issues of active/healthy ageing, literature reviews, measurement and assessment of active/healthy ageing, determinants of active/healthy ageing and its impact on quality of life and wellbeing of the older population. We are also interested in psychosocial, community interventions, public health and environmental interventions that aim at maintaining and increasing the quality of life and wellbeing of older adults. Finally, the importance of the built environment in active/healthy aging will also be displayed in this issue.

The listed keywords suggest just a few of the many possibilities: Built environment; Ageing in place; Public health; Health geography; Sense of community; Quality of life; Wellbeing; Physical activity; Walkability; Social participation; Leisure; Health; Loneliness.

Dr. Maria João Forjaz

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
