Deadline for manuscript submissions: **closed (30 June 2021)**

Message from the Guest Editors

Conventional physiotherapy and exercise/training have been widely explored in interventions management of musculoskeletal disorders. Furthermore. evidence-based clinical practice suggests that the combination of both interventions can lead to the best results. However, the therapeutic approach must respond to the demands of our changing society, especially in this global scenario. The influence of social media, new technological devices, and the access to information of patients require an in-depth exploration of the feasibility of the novel approach in the management of musculoskeletal disorders

Innovation, Richard Dixon Research Center, Morgan State University, 1700 E. Cold Spring Lane, Baltimore, MD 21251, USA

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
