submissions:

closed (31 August 2021)

Message from the Guest Editors

During the unfolding coronavirus disease 2019 (COVID-19) pandemic, in response to the emergency, multiple design and management strategies have been proposed for healthcare facilities.

The scope of the Special Issue is to collect contributions from medical, design, and management fields related to design and management best practices, organizational and technological strategies, hospital layouts and healthcare processes, tools and predictive models for risk management, etc. We welcome submissions on all aspects of the COVID-19 pandemic using scientific evidence supported by international case studies. We strongly recommend learning from relevant experiences, reviews and empirical studies, data-analysis, comparisons among case studies and investigations, predictive models, economic benefits and impacts, design and management strategies, etc. We particularly welcome interdisciplinary research that integrates across important knowledge domains to provide a fuller understanding of the causes and socioeconomic impacts of COVID-19, as well as public understanding and responses, the efficacy of healthcare designs that support innovative management and prevention interventions.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
