Message from the Guest Editors

During the past decades, behavioral addictions such as gambling disorder and gaming disorder have increasingly gained clinical significance. Prevalence rates worldwide emphasize that behavioral addictions, especially the emerging phenomenon of internet-related disorders, are frequently occurring mental health issues leading to heightened psychosocial problems, psychopathological symptoms, and decreased levels of functioning. This Special Issue aims to provide a state-of-the-art perspective on research addressing etiological mechanisms in behavioral addictions. Contributions may cover different kinds of behavioral addictions and may be empirical research papers, comprehensive reviews, or studies addressing theory-driven prevention or interventions approaches.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
