submissions:

**closed (20 December 2017)**

### Message from the Guest Editor

Dear Colleagues,

Illnesses are a barrier to health and wellbeing. The causes can be many and often interact. The physical environment, the digital support systems, the management, the social ambience can all cause stress in various ways.

Illnesses can have an identifiable cause—such as legionellosis, humidifier fever, and conditions resulting from exposure to known substances.

Sick building syndrome is more elusive and the term is used to describe a condition when more people than normal suffer from various symptoms or feel unwell for no specific reason.

This Special Issue will publish research and debate the roots, causes and solutions to deal with physical and mental illnesses, which are fully or partly attributable to buildings and their environment. The hope is that this will lead to healthier buildings for people to work and live in.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
