Message from the Guest Editors

Cancer has a significant impact on public health across the world. This impact will continue to grow as its incidence rises and people live longer. A combination of costs associated with therapy and/or the loss of productivity due to premature cancer mortality and long-term care (palliative care/hospice) of cancer patients take a toll on the economy and physical/mental health at the population level.

Growing challenges of cancer patients need more research and attention. In this Special Issue on “Cancer Care”, certain aspects of cancer care (research or review articles) will be covered, including palliative care, hospice care, long-term care, hospital parameters (e.g., hospital charges, length of stay), mental health, care givers (informal or formal), home healthcare, telehealth, disparity, cancer screening, cancer burden, cancer epidemiology, and cancer prevention.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
