Deadline for manuscript  
submissions:  
**closed (31 January 2022)**

### Message from the Guest Editors

Dear Colleagues,

Around the world, family members and friends provide a vital source of care and support for people as they age. Whether because of health conditions, barriers to social participation, injuries, or other reasons, older adults often experience declines in function, and these impairments can restrict their activities and participation, ultimately resulting in poor health and needs for assistance.

We invite papers from a broad range of perspectives, including but not limited to public health practitioners, policy and legal experts, health care providers, community-based service providers, government agencies, implementation scientists, demographers, social geographers, and health economists. We encourage submissions that use quantitative, qualitative, or mixed-methods approaches. We will also consider papers that present a conceptual framework or address methodological or measurement issues related to caregiving. We welcome submissions that focus on people aging with disabilities, as well as those including people who developed a disability later in life.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
