Dr. Jemma Hawkins

Centre for the Development and Evaluation of Complex Interventions for Public Health Improvement (DECIPHer), School of Social Sciences, Cardiff University, Cardiff CF10 3BD, UK

Message from the Guest Editors

Improving public health requires concerted effort to prevent non-communicable diseases such as cardiovascular disease, cancers, and mental health conditions, and promote positive wellbeing. These outcomes are related to a broad range of ‘modifiable’ behaviours such as smoking, substance use, diet, physical activity, and gambling, which are shaped by interacting causes at multiple socio-ecological levels, from the individual to the political. This Special Issue invites papers that provide empirical case studies or critical reflections on the use of current frameworks and methodologies for developing, evaluating, and implementing interventions to improve public health, or which advance new frameworks or methodologies.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
