Message from the Guest Editor

The need felt and shared by both theoreticians and researchers to further the understanding of compulsive buying—given its noticeable increase in the last few decades and the important personal, social, labor and economic costs it entails—is the *raison d'être* of this Special Issue. The review of the state of the art reveals a complex phenomenon with multiple dimensions and a marked multicausal nature which, therefore, demands integrative approaches that allow for a variety of perspectives. We should seek a broadness of vision that makes it possible to overcome disciplinary “turfs” by encouraging the healthy and welcome integration of ideas, concepts, research methods and strategies from different areas of work (psychology, medicine, sociology, business/marketing, neuroscience, pharmacology, anthropology, among others).

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
