Dr. José A. García-Berná
Software Engineering Research Group, Faculty of Computer Science, University of Murcia, Murcia, Spain

Deadline for manuscript submissions:
closed (31 May 2023)

Message from the Guest Editors

The increasing complexity of today's systems makes it more important than ever to put people first, so that no one is left out. The sheer variety of user needs, profiles, backgrounds and interests must be taken into account to succeed in facilitating human interactions with computing devices of all kinds.

Many recent trends point to this goal, but rather than highlighting the variety of research topics, at this point we would like to emphasise the importance of one specific application domain: healthcare.

In the end, it is all about people and there is no single recipe that can help us achieve the best results in all cases. For that reason, in this special issue we are looking for manuscripts that present new insights on computer-human interactions with a focus on the promotion of the healthcare outcomes.

Special Issue

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.
Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
