Message from the Guest Editor

Dear Colleagues,

Cycling is a common form of physical activity, yet this is a form of physical activity and sport with less evidence around sport medicine interventions to reduce injury burden and impact, allowing people to maintain their levels of physical activity through cycling. It is for this reason that we are launching a new Special Issue in this journal in the area of sport and exercise medicine with a focus on cycling.

Proposed topics include:

- Concussion in cycling;
- Injuries in cycling;
- Illness in cycling;
- Saddle sores;
- RED-S;
- Qualitative research with cyclists;
- Future directions in cycling research.

Dr. Neil Heron

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
