Message from the Guest Editors

Dear Colleagues,

There is ongoing demographic aging taking place in various high-income countries. Since there is a strong positive association between age and, among other things, multiple chronic diseases, dementia, and frailty, it is expected that the number of individuals suffering from these conditions will rise markedly over the next few decades.

Moreover, the geographical distance to family members gradually increases and many individuals lose their friends and relatives in old age. Furthermore, social distancing is an important issue due to the COVID-19 pandemic. All of these factors are associated with loneliness, social isolation, and depressive symptoms in late life. Thus far, limited evidence has been obtained regarding the link between factors such as cognitive functioning, frailty, or multimorbidity and depressive symptoms or loneliness in old age. Therefore, the aim of this Special Issue is to collect novel findings in this research area. Interdisciplinary research is particularly welcome.

We particularly welcome the submission of original research articles, systematic reviews, meta-analyses, and short communications on any of these topics.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
