

Digital Data, Equity and Epidemiology

Guest Editor:

Dr. Yulin Hswen

Department of Epidemiology and
Biostatistics, University of
California San Francisco, San
Francisco, CA 94158, USA

Deadline for manuscript
submissions:

closed (18 December 2022)

Message from the Guest Editor

This Special Issue seeks to provide a landscape of the developing the tools and techniques to analyze digital data and how this data relates to uncovering individual and social behavior and the relationship between disparate distributions of disease morbidity and mortality among underserved populations across the globe, including racial and ethnic minorities, LGBTQ+ persons.

Submissions that examine the historical underpinnings and intersectionality of oppression on population health outcomes that use new big data methods of creating and collecting data, analytical and statistical techniques, or new ways of visualizing and presenting information are of particular interest.

Authors from diverse disciplinary perspectives, leveraging dynamic quantitative and qualitative methodologies, are invited to submit, including epidemiology, public health, health policy, social and behavioral sciences, epidemiology, biostatistics, anthropology, psychology, sociology, economics, education, human geography, engineering, computer science, and statistics. Papers concerning implications for policymaking are welcome.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
