Deadline for manuscript submissions:

**closed (30 September 2023)**

### Message from the Guest Editor

Healthcare challenges in low- and middle-income countries have been addressed through a wide range of digital initiatives that have focused on improving both access to and the quality of healthcare. Beyond the pilot projects, these initiatives are currently strengthening health systems through the scaling up and effective integration of health information systems involving digital health tools.

The goal of this Special Issue is to focus on the contributions of digital health for strengthening health systems in low- and middle-income countries, and to highlight the potential of digital health to positively impact health information systems and empower healthcare workers.

This Special Issue welcomes original research manuscripts, reviews, and case reports considering the perspectives of different stakeholders targeting any of these topics and beyond. We would be delighted to attract a high diversity and heterogeneity of submissions, and we encourage the submission of interdisciplinary work and multi-country collaborative research.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
