Deadline for manuscript submissions:

closed (30 September 2022)

Message from the Guest Editors

Determinants of food-related behaviors from the individual to the policy level have major implications for health outcomes, such as obesity and related chronic diseases, over the life course. Food- and health-related disparities are prevalent among racial/ethnic minority, low-income and other vulnerable populations. The COVID-19 pandemic has exacerbated the issue and serves as an important call to action. Thus, we invite scholars, researchers, and practitioners to submit innovative research on digital and/or community-based research to address determinants of food-related behaviors (e.g., choice, purchase, preparation, consumption, eating patterns, nutrient intake).

Given the multidisciplinary nature of the theme, manuscripts from the fields of nutrition, behavior science, public health, psychology, and sociology, among others will be considered as long as the research aligns with the theme of the Special Issue.

We look forward to receiving your contributions.

Types of Submissions:

- Original Research
- Systematic Reviews
- Research briefs
- Short Communications

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
