Deadline for manuscript  
submissions:

**closed (30 November 2023)**

### Message from the Guest Editors

Frailty is one of the fundamental concepts in geriatrics and in recent decades has become a recognized public health problem. In practice, frailty is often underdiagnosed or perceived as an inevitable effect of the aging process, while prevention guidelines rely on general rules of a high-protein diet and exercise. It is, therefore, crucial to facilitate and promote simple measures for frailty screening in older adults, early detection of risk factors and more personalized treatment approaches. Practice guidelines should be easily accessible for different levels of care and supported by public health programs similarly to solutions in cardiovascular diseases.

The aim of the present topic is to provide a comprehensive overview of the theoretical bases of frailty and new findings, clues for clinical practice and healthcare systems and the application of novel technologies. We welcome reviews, meta-analyses, research papers, case reports and guidelines for practice. We look forward to a lively discussion between science and pragmatic views with the ultimate goal to promote a proactive approach to frailty.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
