submissions:

closed (30 November 2017)

Message from the Guest Editors

Dear Colleagues,

Improving health and lifestyle behaviors of children and adults with disabilities is an important objective for public health, health care, and policy makers. Health promotion interventions range from interventions with individuals, families and caretakers, to addressing community access to healthy behaviors, and societal and policy-level interventions for ensuring accessibility of a healthy lifestyle for all citizens.

This Special Issue is open to any topic or subject area related to health promotion interventions for people with disabilities. We hope to gather submissions related to all ages and disability types, across a wide continuum of intervention modalities and target behaviors.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
