Message from the Guest Editors

This Special Issue of the International Journal of Environmental Research and Public Health (IJERPH) focuses on the evidence for disability inequalities. Special consideration will be given to evidence between barriers to participation and outcomes for persons with disabilities (or specific cohorts of persons with disabilities). Furthermore, this Special Issue will give preference to research demonstrating effective paradigm transformation in the following areas: legislation, social perceptions, environmental and resource policy, and clinical practice.

New research papers (quantitative and qualitative), reviews, brief reports, case reports, and novel approaches to ensuring accessibility of the environment and resources for persons with disabilities are welcome.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
