### Message from the Guest Editor

Dear Colleagues,

We continue to face public health challenges globally and nationally. COVID-19 is catalyzing a crisis and transforming social, cultural, and health systems, and places that do not adequately overcome these challenges face a severe public health crisis. Even in this situation, we must continue efforts to identify and intervene in various health determinants from a public health perspective. This Special Issue looks for articles on risk factors, safety, vulnerability, and healthcare systems in health.

Potential topics include but are not limited to global public health, COVID-19, determinants of health, health risk factors, health equity, safety and health, role of healthcare systems in population health status, and perspectives in public health.

Dr. Myung-Bae Park

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
