Deadline for manuscript  
submissions:  
**closed (31 July 2021)**

### **Message from the Guest Editors**

Dear Colleagues,

The focus of this Special Issue, “Effects of Environmental Exposures in Early-Live Populations”, is the potential impact of exposures on prenatal and/or early-life stages on health and/or biometrics outcomes including but not limited to delay effects, respiratory problems, cognitive development, etc. The exposures of interest include, but are not limited to, both environmental (air pollution, chemical exposition, etc.) and dietary (including component and mixture exposures). Due to the complexity of most of the methods used in these studies, works containing strong methodological background or even proposing new statistical methodologies for dealing with environmental health issues or novelty applications are also welcome.

This Special Issue is open to any subject area related to the impacts of the built environment on public health.

Dr. Pablo Martinez-Cambor

Dr. Aitana Lertxundi

Dr. Ana Fernandez-Somoano

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
