### Message from the Guest Editors

The period of pregnancy and the first two years of a child's life (first 1000 days) encompass multiple factors that can influence the long-term health and economics for the individual child, their family, and the wider community. Many of these early life factors can be encouraged and supported as positive influences, or reduced and discouraged when they are negative influences. These factors may include nutrition of mother or child, birth practices, mental health of the parents, support systems, environment, family or broader economics, government policies, marketing of products and practices, employment, and use of time, among other factors.

We invite authors to submit original research papers or systematic review papers for the Special Issue entitled "Early Influences on Child Health and Wellbeing". Our aim is to cover a wide range of topics and perspectives related to the first 1000 days, not only in the basic research domain, but also related to interventions for the promotion, support, and protection of health and wellbeing. Papers reporting on methodological aspects of research in this area will also be considered.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
