Message from the Guest Editor

Due to the widespread use, persistent discharge into the environment and ineffective treatment of WWTP, studies have reported a number of chemicals, including human and veterinary drugs, personal care products and household chemicals, in various water resources all over the world. As emerging contaminants, growing concerns to the scientific community have been raised for their potential harmful effects to the environment and human health. In particular, high awareness regarding cosmetic products is expected to drive the market's growth in the near future, especially due to the decline observed during the outbreak of coronavirus disease 2019, requiring new environmental monitoring and toxicological studies.

Experts are invited to contribute original research and review articles in the Special Issue "Ecotoxicology and Environmental Health of Pharmaceuticals and Personal Care Products".

The contributions should be focused on new mechanisms and/or new approaches to advance our understanding on the environment and human health effects by these compounds to be used as an important source of information for the community.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
