### Message from the Guest Editors

A Special Issue on “Occupational Safety and Health: Emerging Psychosocial Risk Factors” is being organized in the International Journal of Environmental Research and Public Health.

Social, economic, and demographic changes have led in recent years to increasingly consider the role of emerging psychosocial risks impacting the health and quality of working life of individuals and organizations.

The aim of this special issue is to consider quantitative, qualitative, and mixed-method studies or literature reviews that may deepen knowledge on emerging challenges for the future of work.

These may include studies on the emergence of psychosocial risk in the post-pandemic period:

- e.g. - The implication of Covid-19 on working safely for the older workers and its impact on workability and wellbeing.
- the perceived job insecurity across ages and between genders (e.g. the shecession phenomenon),
- the long-lasting effect of remote work and massive use of technology;
- the management of return-to-work after Covid-19.

Also, studies that consider OSH issues among green and circular economy jobs will be welcome to enlarge knowledge on these topics.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
